NDC – Waiver type in exchanges flow

A new drop-down menu containing waiver type options has been added to the NDC Exchange Shop flow and the new Exchange shop flow for those airlines that support the feature. From the advanced qualifiers and/or optional qualifiers menu, depending on which flow you are using, you can choose from waiver type: Schedule change, Change fee and Additional collection change fee. Along with the waiver type you can also provide waiver code if provided by the airline.

Servicing - EDIFACT Exchange shopping using original pricing qualifier(s)

The new Exchange Shop and Book workflow has been enhanced with a new check-box qualifier “Use pricing parameters from the original ticket”. This new qualifier streamlines the exchange shopping process by ensuring that the new ticket retains the same pricing qualifiers from the original ticket. Qualifiers applied to the shop request, when present are: Account Code, Corporate ID, Private or Public Fare Indicator, Agency Retailer Rule Code and Brand which also ensures that only equal or higher-quality branded fares are returned. (no brand down-grade)

When a customer exchanges a ticket, the system will automatically apply the following pricing qualifiers from the original ticket to the new pricing options:

- Account Code
- Corporate ID
- Agency Retailer Rule Code
- Private Fare Indicator
- Cabin
- Brand
- Passenger Type

These pricing attributes are integrated into the exchange shopping request and will ensure the new ticket benefits from the same pricing structure as the original.

The new qualifier is configurable and can be configured in the Web Agency Admin Tool (AAT) and can be enabled or disabled or set as pre-checked or un-checked by default in the Exchange shop form. The default is enabled and un-checked.

Servicing - New Exchange Shop & Book - support of FOP (form of payment) wallet

The Exchange shop and book workflow (Change) has been enhanced and now auto-populates form of payment(s) from the PNR FOP wallet. The user can select the form of payment from the FOP Wallet field during the exchange process without a need to provide any further details.

The Payment method list is pre-populated with the form of payment from the FOP wallet of the reservation along with the use type. If a single form of payment with the valid use type for exchange process (Airline, All, or no use type) is stored in the wallet, the system will automatically select it as the default payment method during the exchange workflow. If multiple payment methods exist in the wallet, the consultant must manually choose the desired payment method from the available options.

Arrival and Departure option in Hotel Reservation modal

With this release, Hotel Reservation modal will always contain the optional fields to provide Arrival and departure information:

- Arrival time, airline code and flight number
- Departure time, airline code and flight number

In the past, these options were available only for a specific configuration due to limitations for legacy hotel bookings. As legacy path has been sunset, the feature is now available for each hotel booking.

The screenshot displays the 'Hotel Reservation' modal with the following details:

- Hotel:** Ritz Carlton New York Central Park, 50 Central Park South, 212-308-9100
- Dates:** 12 Oct 2025 (Check-in), 18 Oct 2025 (Check-out)
- Room:** 1 room, 1 guest, SIE, Negotiated
- Refundable:** 3 Days prior to arrival
- Rate:** USD 1341.33* (avg. nightly rate, excludes taxes & fees)
- Total:** USD 9256.09 (approximate total with taxes & fees)

Guest Details:

- Traveler's name: 1.1 SMITH, ANNE
- Corporate discount number (Optional)
- Frequent guest number (Optional)
- Frequent flyer number (Optional)

Payment details:

- Payment type: Guarantee with credit card
- Card Number
- Card Type
- Expiration date
- First name (Optional)
- Last name

Additional requests:

- Crib (Optional): USD 0.00 per crib
- Rollaway bed (Optional): USD 95.00 per rollaway
- Supplemental information (Optional)

Arrival and departure information:

- Arrival time (Optional)
- Airline code and flight number (Optional)
- Departure time (Optional)
- Airline code and flight number (Optional)

Buttons: CANCEL, BOOK

PNR

Trip Summary warnings

Within this release the warning indicators were enriched by a tooltip. There are 2 tooltips that may occur:

- Price Quote does not exist
- Different arrival and departure airports

They may appear separately or together, depending on the segment they apply to.

The screenshot shows a PNR summary with a 'Travelers (0)' section. Below it, there are four flight segments, each preceded by a yellow warning triangle icon. A tooltip is displayed over the first two segments, containing the text: 'Price Quote does not exist' and 'Different arrival and departure airports'. The segments are as follows:

| Segment | Flight Details | Flight Number |
|---------|--|---------------|
| 1 | ONT ▶ ATL 12 Aug 10:00 PM - 13 Aug 5:22 AM | DL 828 E |
| 2 | ATL ▶ ONT 13 Aug 8:55 AM - 13 Aug 11:19 AM | DL 1034 E |
| 3 | LGA ▶ MSP 26 Aug 3:15 PM - 26 Aug 5:40 PM | DL 2349 E |
| 4 | MSP ▶ LAX 26 Aug 6:24 PM - 26 Aug 8:23 PM | DL 2122 E |

Below the flight segments is a 'Hotel (0)' section.

Add Prince & Princess prefix to graphical add to PNR

Within this release new Titles / Prefixes have been added when entering travelers name: Prince and Princess.

CO2 Remark workflow update

Two new optional elements have been added to the CO2 workflow:

1. Add remarks to PNR per flight leg with segment association.
2. Auto add emission remarks to PNR upon end transaction.

CO2 Remarks ✕

Total CO2 for current trip: 273 kg.

⚠

 Only partial data available for this itinerary.

OTHER

As a user I would like to see a warning regarding SR360 upgrade

Apple silicon Mac (aarch64) users will be required to upgrade to the SR360 version dedicated for this hardware setup - they will need to download a dedicated installer and reinstall SR360. This is to prepare these users' installations for the upgrade of the SR360's embedded browser (JxBrowser, version 8) which is expected in release 24.9.

Update Encode/Decode sources for SR360 Release 25.8

Encode/Decode tables are updated with the latest changes.

New Themes (see: SAN 17850)

SDK

Updates to existing beforeCreateOrderInput extension point (data model update).

Data model has been updated with following elements:

- GST information
- Agency information
- Identity card
- Citizenship
- Secure flight
- Visa
- Resident/Destination address

New Workflow Extension Point: `dynamo.pnr:beforeTravelerModification`

New `dynamo.pnr:beforeTravelerModification` extension point is executed when user is modifying or deleting travelers from PNR.

It is triggered from graphical path either from Trip Summary or GPNR.

IReservationService - Profile details enhancement

Red app developers will have access to additional data from IReservationService such as: Profile number, Profile short type and owning agency.

DEFECTS FIXED

HOW TO VERIFY THE UPDATE

Updates occur by either manually “checking for updates” under “Help” or with no intervention on your part 20 minutes after starting up, with no impact to your workflow. Please note the update will not go into effect until you have restarted your system. To validate that you have implemented the update, you may type in STAT command and in a response value of “Release Version” field will indicate actual version of the system.

SYSTEM REQUIREMENTS/PREREQUISITES

The Sabre® Red™ 360 is a managed client application that is downloaded and installed in a variety of configurations. The Sabre technical development and quality assurance teams have tested various scenarios to determine minimum hardware specifications for the end user’s workstation.

An installation of Sabre® Red™ 360 on a workstation that does not meet these specifications may not function properly and cannot be supported by Sabre.

OPERATING SYSTEM SOFTWARE

We support the installation and operation of Sabre Red 360 on a workstation that meets one of the following specifications:

- Microsoft Windows 10 – 32 and 64-bit
- Microsoft Windows 11
- Microsoft Windows Server 2016, 2019, 2022
 - Basic support for Terminal Services environment including Citrix.
- macOS Ventura or later (13.7.2 or later)
 - We recommend 64-bit Windows 10 and macOS Sequoia (version 15)

HARDWARE SPECIFICATIONS

Processor:

- Minimum:
 - Intel Core i3 Dual-core processor with 3.3 GHz (or AMD equivalent)
- Recommendation:
 - Intel Core i5 Dual-core processor with 3.2 GHz (or AMD equivalent)
 - Apple silicon (Apple-designed chip based on ARM architecture)
- Memory:
3.5 GB RAM for 32-bit OS or 8 GB RAM for 64-bit OS.
- 1.6 GB of free disk space for the first user on a standard desktop installation, and 240 MB for each additional user. Additional storage may be required for other agency applications.

- Monitor: 1366x768 is highly recommended. Monitors with lower resolution will work, but the user experience will be sub-optimal.

PERMISSIONS AND RIGHTS

Sabre Red 360 requires “Full” rights or permissions to the installation and user directories that it will be installed too. Additional information on permissions, directory options, and locations can be found on the Advanced Installation User guide.

NETWORK

- Sabre® Customer Virtual Private Network Connection – Customer-supplied Internet connection.
Note: SCVPN requires access to this URL.
 - <https://scvpn.havail.sabre.com>
 - 151.193.159.130
 - 151.193.159.2
 - Port 443
 - The RMI server connection to SCVPN will use port 10099 on the local machine.
- Private Connection - Dedicated connection to Sabre
 - Business to Business VPN (B2BVPN)
 - Managed Network Services
 - Vendor Access Room connections
 - **Note:** Ports 443, 80, 389, 30030, 30031, 30032, and 30051 open for the 360 communication processes to work properly.
- Complete list of required URLs, Ports and IP Addresses can be found on [Sabre Central](#), under:
Support > Additional Support Resources > Product Release Notes & Related Information > Sabre Red 360 > Technical Requirements – Sabre Red 360
- And look for the following documents:
- Sabre Red Connectivity Guide for PROD – May 2024
- Sabre Red Connectivity Guide for CERT – May 2024

EXPECTED SYSTEM DOWN TIME

You will not experience any down time because of this release. This release update will be downloaded in the background. After it finishes downloading to your local workstation you will be presented with the option to restart now or later.

AGENCY ADMIN TOOL

By utilizing the Agency Admin Tool, you are leveraging the flexibility of the Sabre Red 360. You have control over what tools and feature your users can see and use within the Sabre Red 360, and you can

control the timing of update delivery to your users. This powerful control over the Sabre Red 360 supports the efficiency of your users and your operations.

The date of the release is of importance if you are utilizing the Agency Admin Tool to lock down a set of users to control when the update is delivered to them. The locking function of the Agency Admin Tool is designed to allow you to lock down a set of users on the last version of the Sabre Red 360, and leave other targeted users unlocked for testing purposes, providing the utmost flexibility to test the update prior to a wide deployment in your environment.

To lock these users, you need to complete a few critical steps as the agency admin, no later than day before release date to ensure these users do not receive the update on the day of release.

- Login to Sabre Red Workspace
- Access the Agency Admin Tool and lock all users at your agency from receiving the update.

For further documentation and additional information on the Agency Admin Tool as well as details on the release, please visit the Sabre Red 360 community on Sabre Central.

CONTACT INFORMATION

If you need help, contact the Sabre Help Desk using web Callback method.

- Access Sabre Central and navigate to:
<https://central.sabre.com/s/contactsupport>
- You can request a Callback (if available) to get faster support or submit an Online Case if you prefer a written answer.
