# New Features

## AIR

NDC – Book Limo service for NDC offers.

Users can now book limo ground transportation for NDC offers from the mobility and service requests widget. After selection, the user will be prompted to provide additional information such as pick-up time, contact number and address details. Once complete, the limo service will display as an order item in the graphical PNR > Quotes display.

PROPOSE

CREATE ORDER

After clicking on the widget, the user will be presented with the bundles that the airline offers along with the price.

The screenshot displays the Sabre Red 360 interface for a flight from SFO to ORD. The flight details show UA 1448, United Airlines, departing on 12NOV, 05:10, and arriving on 12NOV, 11:30. The fare is Economy, and the offer expires in 16m 40s. The price is guaranteed until no data is available. The total price is AUD 599.60.

A modal window titled "Dynamic bundled fares" is open, showing the passenger name BERKA, JACEK (Adult). The modal lists several bundles with their respective prices:

Bundle	Price (AUD)
Economy Plus, Premier Access and Club Trip Pass	AUD 759.84
Extra Bag	AUD 108.00
Extra Bag and Club Trip Pass	AUD 270.00
Premier Access	AUD 172.00
Premier Access and Club Trip Pass	AUD 340.00

The modal also includes a search bar, a "Total AUD: 0.00" indicator, and "CANCEL" and "SAVE" buttons. Below the modal, the "VIEW ALL" button is highlighted.

The second screenshot shows the "Dynamic bundled fares" modal with the "Extra Bag" bundle selected. The bundle is listed as "Extra Bag" with a price of AUD 54.00. The "Segments" dropdown is set to "1 of 2 segments". The "Premier Access and Club Trip Pass" bundle is also selected, with a price of AUD 340.00. The "Segments" dropdown is set to "All segments". The total price is now AUD 394.00. The "CANCEL" and "SAVE" buttons are visible at the bottom.

The bundle item is displayed in a drop-down menu, along with the total for each individual bundle. Once selections are made, the combined total for all selected bundles appears in the bottom-right corner of the screen. After saving, the user is returned to the pricing screen, where the widget updates to show “Edit bundles.” This allows the user to review or modify their selections.

Next, during the order creation process, the **Bundled Fares** section presents a summary of the selected bundles. Users can also make edits at this stage if needed.

NDC FULFILL ORDER

## NDC – Change an unfulfilled order.

Users can now modify NDC orders prior to fulfilment. This enhanced workflow leverages familiar patterns from the existing NDC re-shop process, making navigation intuitive and seamless.

To make a change, open the **Trip Summary** panel, navigate to the **Air Segments** section, click the relevant segment, and select **“Change.”**

The screenshot shows the Sabre NDC interface. At the top, the user is logged in as BERKA, JACEK. The 'QUOTES' tab is selected. A flight segment is highlighted, and a dropdown menu is open, showing options: Refresh, Seats, Add hotel, Add car, **Change** (highlighted), and Delete segment. The main panel shows a list of order items with flight details for SIN to MEL and MEL to SIN.

The user is then shown the current flight details, along with options to update the city pair, travel dates, or cabin class—either for the entire journey or for individual legs.

The 'Change' dialog box is shown, allowing users to modify flight details. It displays two flight segments: Singapore (SIN) to Melbourne (MEL) and Melbourne (MEL) to Singapore (SIN). Each segment has fields for Origin, Destination, Departure date, and Cabin (Optional). The 'Change' button is highlighted.

From	To	Date	Time	Flight	Status
SIN	MEL	12 NOV	00:25 - 10:50	SQ 237	Confirmed
MEL	SIN	19 NOV	19:25 - 00:15 +1	SQ 208	Confirmed

The response will display the flights available for selection.

REBOOK ORDER

## Shop Flights – Shop and filter by seat type.

Users can now apply the new “seat type” shopping qualifier in the Shop Flights workflow. This addition compliments existing qualifiers like cabin type and number of stops, enabling users to search for flights and fares that offer specific seat types to better meet traveler needs. Multiple seat types can be included in a single shopping request if desired.

The screenshot shows the 'SHOP FLIGHTS' tab in the Sabre interface. A dropdown menu is open for the '1 seat type' filter, listing various seat options: Standard legroom, Below average legroom, Above average legroom, Middle seat free, Skycouch, Cradle recliner, Recliner seat, Angle flat seat, Full flat seat, Full flat pod (selected), and Private suite. The 'Full flat pod' option is highlighted with a blue circle and a checkmark. The background shows the flight search form with fields for Origin, Destination, Departure date, Return date, and Departure time (Optional). There are also buttons for 'CANCEL' and 'SHOP FLIGHTS'.

As well as being able to shop by seat type, the user can also filter by the seat type returned in the response when fare upsells are returned.

**Note** – When seat type information is unavailable, the fare card will show “no data” and the filter will remove the fare showing “no data” when a seat type is selected.

The screenshot shows the 'Available fares' section of the Sabre interface. It displays a list of fare cards for the route DFW to LHR. The first card is for American Airlines (AA 80) with a total price of \$714.91. The second card is for American Airlines (AA 21) with a total price of \$939.91. The third card is for Sabre Premium Economy with a total price of \$2093.91. The fourth card is for Sabre Premium Economy Flexible with a total price of \$2393.91. The fifth card is for Sabre Flagship Business with a total price of \$4492.91. The sixth card is for Sabre Flagship Business Flexible with a total price of \$4992.91. Each card shows details like 'Checked bags: 1 free bag, up to 5...', 'Change: Free', 'Refund: Not allowed', and 'Seat selection: Free'. A 'Seat type' filter is applied to the list, showing 'Standard legroom', 'Cradle recliner', and 'Full flat pod'. The 'Full flat pod' option is selected. There are buttons for 'PROPOSE' and 'SELL & SAVE PRICE'.

## Change workflow – New Compare Fares modal.

Users can now see full brand inclusions and compare them for Sabre fares during the exchange shop process after flight selection. This enhancement brings the exchange shop response closer to the Shop Flights shop response, providing a seamless and familiar experience for the user.

## New Cancel workflow extension points

The new extension points are triggered when a Cancel transaction is executed in the graphical Cancel workflow from Trip Summary > Tickets

The new **dynamo.cancel:beforeCancelDocument** extension point is executed before a Cancel request is sent in the graphical Cancel workflow.

The new **dynamo.cancel:afterCancelDocument** extension point is executed after a Cancel response is returned in the graphical Cancel workflow.

Triggered from the graphical path:

- EDIFACT ticket/EMD within the void period
  - Cancel option → Continue → Cancel tickets
- EDIFACT ticket outside of the void period (refund)
  - Cancel option → Continue → Calculate refund → Cancel tickets
- NDC ticket/EMD within the void period
  - Cancel option → Continue → Cancel tickets & keep flights → Cancel tickets
  - Cancel option → Continue → Cancel flights & tickets → Cancel all
- NDC ticket/EMD outside of the void period (refund)
  - Cancel option → Continue → Cancel flights & keep ticket value for future use → Cancel flights
  - Cancel option → Continue → Cancel tickets & keep flights → Cancel tickets
  - Cancel option → Continue → Cancel flights & tickets → Cancel all

## CO<sub>2</sub> remark configuration in Agency Admin Tool

With this release, you can now configure various CO<sub>2</sub> remark settings—such as time-to-add, amount, remark type, and prefix—using the Agency Admin Tool (AAT) via JSON. All configuration options are optional. However, once any part of the CO<sub>2</sub> workflow is configured in AAT, that portion becomes non-overridable in SR360, both in the settings and within the CO<sub>2</sub> workflow itself.

If an agency wants travel consultants to retain flexibility in how they use CO<sub>2</sub> remarks, configuration through AAT should be avoided.

. In an Agency Admin Tools configuration:

- The "onTransactionEnd" element rules whether the "Add emission remarks on transaction end" check box should be turned ON (true) or OFF (false) in SR360.
- The "perSegmentRemarkStructure" element rules whether the "CO<sub>2</sub> remarks per flight leg (with segment association)" check box should be turned ON (true) or OFF (false) in SR360.
- The "type" element rules which remark type should be pre-configured in the "Remark types" section.
- The "prefix" element defines a custom prefix that will be added to all CO<sub>2</sub> remarks.

Exemplary configuration:

```
{
  "onTransactionEnd": {
    "checked": false
  },
  "perSegmentRemarkStructure": {
    "checked": true
  },
  "type": [
    {"invoice": {"checked": false}},
    {"itinerary": {"checked": false}},
    {"general": {"checked": true}}
  ],
  "prefix": "CO2 test"
}
```

---

## Reservation dashboard display

With release 25.9, a new feature called Dashboard has been introduced under the PNR tab. The Dashboard displays all PNRs created in the agent's home PCC using their sine.

When the agent is AAA'd, the Dashboard will show all PNRs created by that agent within their agency.

The dashboard can also be sorted by:

- Start Date (travel date)

*Sabre Red 360 and Sabre Red Web Release Notes*

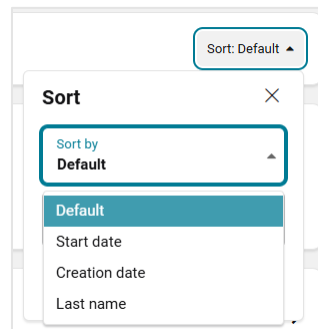

- Creation date (reservation creation date)
- Passenger last name (alphabetical order)

The Dashboard displays recently created PNRs and includes the following details:

- First traveller's name and surname
- Number of travellers
- Phone number and email address, if provided
- PCC and record locator
- Air segments are grouped into a single entry showing:
  - Departure airport code & date
  - Arrival airport code & date
- For multiple segments, the first departure and final arrival details are shown.
- Hotel segments are listed per property and date range; multiple entries may appear.
- Car segments are listed per pick-up/drop-off location and dates; multiple entries may appear if locations or dates differ.

The screenshot shows the Sabre PNR dashboard. At the top, there are tabs for Profile, Air, Hotels, Car, PNR (selected), and Proposal. Below the tabs are buttons for F1. trace On, F2. Trace List, F3. Trace Clear, F4. Printer BSP, and F5. Printer ABC. The main section is titled "PNR" and includes a dropdown for "Active" and "Current PCC". Below this are input fields for "Record locator", "Email", "Last name", and "First name". There are "CANCEL" and "SEARCH PNR" buttons. The "My PNRs" section shows a list of recent PNRs with a "Sort: Default" dropdown. The list contains two entries:

PNR Number	Passenger Name	Record Locator	Air Segments
1	Toponz, Kata 1 passenger BNE-23456788765	QAHAWS R14I	MEL • SYD 10OCT - 20OCT MAN 10OCT - 11OCT MAN 13OCT - 14OCT SYD 11OCT - 12OCT MEL 02DEC - 06DEC
2	Niedzielska, Katarzyna 1 passenger BNE-234567654	OWPJPK R14I	CAK 10JUN - 18JUN

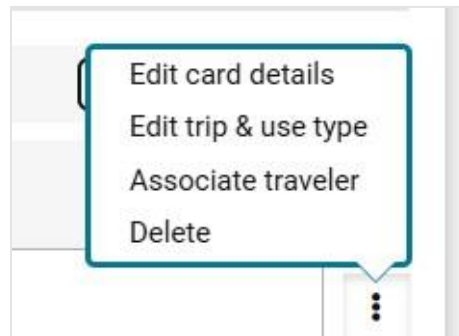

## View Reservation – edit Trip type & Use type separated from Form of payment

In previous releases, **Trip Type** and **Use Type** were part of the **Form of Payment** and remained combined when adding payment details to a PNR.

With this release, while they still appear together during the initial Form of Payment entry, they have now been **split for editing purposes**. This change was made because editing Trip Type or Use Type no longer requires re-confirming the full credit card number.

This update improves flexibility and simplifies adjustments without compromising data integrity.

**Edit card details** ×

Credit card number	Credit card code	Expiration date	Security code (optional)
4XXXXXXXXXX1111	VI	12 - 29	
First name (optional)	Last name	Airline code (optional)	Approval (optional)
Katarzyna	Niedzielska		<input checked="" type="checkbox"/> Generate an Approval

CANCEL CHANGE

**Edit trip type & use type** ×

Select trip type & use type you want to link to the following form of payment.

Type	Expiration date	Credit card ending	Use type (optional)	Trip type (optional)
VI	12/29	1111	Other	Leisure

CANCEL CHANGE

## DEFECTS FIXED

Reference	Description
TNNSRW-6659	Resolved an issue in the SDK 25.6.6 Java 17 – Swing Control Layout Manager behave incorrectly under scaled display
TNNSRW-6698	Resolved an issue found when Scripts scaled incorrectly, appearing outside Sabre screen or not showing, found in 25.6 release
TNNSRW-6721	Resolved an issue found when frequent guest numbers cannot be removed when added from Profiles with exceeding limit
TNNSRW-6732	Resolved an issue where the screen jumped after user had not used Sabre for a period of time.
TNNSRW-6729	Resolved an issue where SR360 displayed an incorrect price guarantee time limit for NDC offers.
DE321534	Resolved an issue found when installing 25.9 version using 25.6 or 25.3 installer file.

## HOW TO VERIFY THE UPDATE

---

Updates occur by either manually “checking for updates” under “Help” or with no intervention on your part 20 minutes after starting up, with no impact to your workflow. Please note the update will not go into effect until you have restarted your system. To validate that you have implemented the update, you may type in STAT command and in a response value of “Release Version” field will indicate actual version of the system.

## SYSTEM REQUIREMENTS/PREREQUISITES

---

The Sabre® Red™ 360 is a managed client application that is downloaded and installed in a variety of configurations. The Sabre technical development and quality assurance teams have tested various scenarios to determine minimum hardware specifications for the end user’s workstation.

The installation of Sabre® Red™ 360 on a workstation that does not meet these specifications may not function properly and cannot be supported by Sabre.

### **IMPORTANT:**

To ensure proper functionality and compatibility, you must update the installer **once every quarter of the year**. Outdated installers can lead to application failures. New installers are published with every quarterly release and are available for download upon early access production activation date.

Installers are available for both **CERT** and **Production**.

## OPERATING SYSTEM AND SOFTWARE

---

We support the installation and operation of **Sabre Red 360** on a workstation that meets one of the following specifications:

- Microsoft Windows 10 – 32 and 64-bit.
- Microsoft Windows 11.
- Microsoft Windows Server 2016, 2019, 2022.
  - Basic support for Terminal Services environment including Citrix.
- macOS Ventura or later (13.7.2 or later).

**Note:** We recommend 64-bit Windows 10 and macOS Sequoia (version 15).

- The latest version of Microsoft Edge for Windows or Safari for macOS.

### **Sabre Red Web:**

- The latest version of Chrome or Microsoft Edge for Windows, Safari for macOS.

## HARDWARE SPECIFICATIONS

---

**Sabre Red 360:**

- Processor:
  - Minimum:
    - Intel Core i3 Dual-core processor with 3.3 GHz (or AMD equivalent).
  - Recommended:
    - Intel Core i5 Dual-core processor with 3.2 GHz (or AMD equivalent).
    - Apple silicon (Apple-designed chip based on ARM architecture).
- Memory (RAM):
  - Minimum:
    - 4 GB RAM for 32-bit OS or 8 GB RAM for 64-bit OS.
  - Recommended:
    - At least 8 GB for both 32 and 64-bit OS.
- Disc space:
  - 1.6 GB of free disk space for the first user on a standard desktop installation, and 240 MB for each additional user.

**Note:** Additional RAM and storage may be required for other agency applications.

- Minimum screen resolution: 1366x768. Lower resolution will work, but the user experience will be suboptimal.

**Sabre Red Web:**

- Processor:
  - Minimum:
    - Intel Core i3-2120 @ 3.30GHz (or AMD equivalent).
  - Recommended:
    - Intel Core i5-6200U @ 2.30GHz (or AMD equivalent).
    - Apple silicon (Apple-designed chip based on ARM architecture).
- Memory (RAM):
  - Minimum:
    - 2 GB RAM.
  - Recommended:
    - At least 3 GB RAM.

**Note:** Additional RAM may be required for other agency applications and used OS.

- Minimum screen resolution: 1366x768. Lower resolution will work, but the user experience will be suboptimal.

## PERMISSIONS AND RIGHTS

Sabre Red 360 requires “Full” rights or permissions to the installation and user directories that it will be installed too. Additional information on permissions, directory options, and locations can be found on the Advanced Installation User guide.

## NETWORK

- Sabre® Customer Virtual Private Network Connection – Customer-supplied Internet connection. SCVPN requires access to the URLs below.
  - <https://scvpn.havail.sabre.com>
  - 151.193.159.130
  - 151.193.159.2
  - Port 443
  - The RMI server connection to SCVPN will use port 10099 on the local machine.
- Private Connection - Dedicated connection to Sabre
  - Business to Business VPN (B2BVPN)
  - Managed Network Services
  - Vendor Access Room connections

**Note:** Ports 443, 80, 389, 30030, 30031, 30032, and 30051 open for the 360 communication processes to work properly.

- Complete list of required URLs, Ports and IP Addresses can be found on [Sabre Central](#), under: *Support > Additional Support Resources > Product Release Notes & Related Information > Sabre Red 360 > Technical Requirements – Sabre Red 360*
  - Sabre Red Connectivity Guide for PROD – May 2024
  - Sabre Red Connectivity Guide for CERT – May 2024
- Bandwidth requirements:
  - Minimum:
    - For installation and upgrade: download 1.5 Mbit/s (192 kB/s), upload 256 kbit/s (32 kB/s).
    - For business usage: download 256 kbit/s (32 kB/s), upload 256 kbit/s (32 kB/s).
  - Recommended:
    - For installation and upgrade: download 2 Mbit/s (256 kB/s), upload 512 kbit/s (64 kB/s).
    - For business usage: download 512 Kbit (64KB/s) / upload 512 Kbit (64 kB/s).

**Note:** Increasing network speed above optimal will result in faster response times for some big requests.

## EXPECTED SYSTEM DOWN TIME

You will not experience any down time because of this release. This release update will be downloaded in the background. After it finishes downloading to your local workstation, you will be presented with the option to restart now or later.

## AGENCY ADMIN TOOL

By utilizing the Agency Admin Tool, you are leveraging the flexibility of the Sabre Red 360. You have control over what tools and features your users can see and use within the Sabre Red 360, and you can control the timing of update delivery to your users. This powerful control over the Sabre Red 360 supports the efficiency of your users and your operations.

The date of the release is of importance if you are utilizing the Agency Admin Tool to lock down a set of users to control when the update is delivered to them. The locking function of the Agency Admin Tool is

designed to allow you to lock down a set of users on the last version of the Sabre Red 360, and leave other targeted users unlocked for testing purposes, providing the utmost flexibility to test the update prior to a wide deployment in your environment.

To lock these users, you need to complete a few critical steps as the agency admin, not later than one day before the release date to ensure these users do not receive the update on the day of release.

- Login to Sabre Red Workspace
- Access the Agency Admin Tool and lock all users at your agency from receiving the update.

For further documentation and additional information on the Agency Admin Tool as well as details on the release, please visit the Sabre Red 360 community on Sabre Central.

## CONTACT INFORMATION

---

If you need help, contact the Sabre Help Desk using web Callback method.

- Access Sabre Central and navigate to:  
<https://central.sabre.com/s/contactsupport>
- You can request a Callback (if available) to get faster support or submit an Online Case if you prefer a written answer.
